

Subject: REACH REGULATION

The REACH regulation provides that citizens of the European Union, in addition to access to information on chemicals, can participate in the decision-making processes on chemicals.

Public participation is guaranteed through the public consultation procedure foreseen in specific cases by the REACH and CLP regulations, activated by ECHA with the invitation to interested parties to express an opinion.

The REACH regulation (EC 1907/2006) concerning the update on the list of SVHC substances of the candidate list and list of substances subject to the authorization regime (public consultation ECHA list) was updated on 14 June 2023.

In accordance with the REACH provisions, those producing or importing from EEC and EXTRACEE countries a substance as such or contained in a preparation or article, in quantities equal to or greater than one tone, will have to register it within 6 months of time at ECHA.

Tex Cavi srl being a downstream user and not producing or importing directly from CEE and EXTRA UE countries does not have the obligation to pre-register the substances used.

Despite this, we require the safety data sheets of the purchased product to be supplied to each supply, collecting all data relating to the adaptation to the standards in question from our suppliers.

The safety data sheets are available for any clarification.

We declare that to date (except for communications which we assume almost nil from our suppliers) the products we have made and supplied to, are not included in the ECHA list of dangerous substances (SVHC), a candidate list updated to 14 June 2023.

This communication serves to keep you updated on the REACH adaptation process, we also inform you that the candidate list is updated every 6 months.

(June and January of each year) <https://echa.europa.eu/it/candidate-list-table>

Remaining available for any clarification, we take the opportunity to offer

BEST REGARDS
TEXCAVI SRL
